

Covid Vaccination (Age group 20-29)

Dear Students,

The government has extended the vaccination program for the age group of 20 – 29 years. We would like to request you to make use of this opportunity to get your vaccination for Covid 19. This will be helpful for us to request permission to get students in small groups for on-campus activities when the country situation improves.

If you are residing in an area where you have access to this vaccination program, please obtain the vaccine by following the procedure announced by the health authorities.
